Dental anesthesia: Painless Cordless Effortless

Compact handheld device designed for dentists to provide painless anesthesia
Dentapen offers patients better comfort by significantly reducing pain and eliminating fear of injections.

Dentapen helps dentists avoid muscle strain caused by repeated manual injections.

Suitable for all anesthesia techniques: palatal, infiltration, block and intraligamental.

**Two-way activation**
- Cordless, Battery powered
- **Compact and light (40g)**
- Compatible with standard 1.7mL cartridges
- Rotating barrel for easy bevel placement
- Self-aspiration
- Autoclavable cartridge holder

**3 speeds**
- **Slow** 90 s/mL
- **Medium** 60 s/mL
- **Fast** 30 s/mL

**2 modes**
- Intraligamentary mode
- Ramp-up mode = anesthesia flow increases gradually for totally painless procedure

* computer-controlled local anesthesia device
Patients feel less pain with

Controlled initial force and constant flow for smoother injections
